Amendments to the Claims

1. (Withdrawn)
2. (Withdrawn)
3. (Withdrawn)
4. (Withdrawn)
5. (Currently Amended) A device for securing a suture to a suture attachment site in a patient comprising:
 - a body having a suture entrance and a suture exit;
 - a motive suture delivery mechanism ~~disposed within~~ associated with said body; and
 - said motive suture delivery mechanism including a sensory feedback element indicative of delivery of said suture to said suture attachment site.
6. (Previously Presented) A device according to claim 5, wherein said sensory feedback element is an audible tone.
7. (Previously Presented) A device according to claim 6, wherein said audible tone is a changing audible tone.
8. (Previously Presented) A device according to claim 7, wherein said changing audible tone is generated by said motive suture delivery mechanism.
9. (Previously Presented) A device according to claim 8 wherein said motive suture delivery mechanism includes a battery powered motor.

10. (Previously Presented) A device according to claim 5 wherein the body is sized and shaped to anchor the suture on a posterior portion of a patient's pubic bone.

11. (Previously Presented) A device according to claim 5, wherein said sensory feedback element is a visual indicator.

12. (Currently Amended) A device for securing a suture to a suture attachment site in a patient comprising:

a body having a suture entrance and a suture exit;

a motive suture delivery mechanism ~~disposed within~~ associated with said body;

said motive suture delivery mechanism including a sensory feedback element indicative of delivery of said suture to said suture attachment site;

wherein said sensory feedback element is a visual indicator, and

wherein said visual indicator includes cessation of twisting of said suture.

19. (Currently Amended) A device according to claim ~~1825~~, wherein the bone anchor ~~includes~~ is a bone screw or staple.
20. (Currently Amended) A device according to claim ~~1825~~, wherein said sensory feedback element is an audible tone.
21. (Previously presented) A device according to claim 20, wherein said audible tone is a changing audible tone.
22. (Currently Amended) A device according to claim 21, wherein said changing audible tone is generated by said ~~bone anchor~~ suture delivery mechanism.
23. (Currently Amended) A device according to claim ~~1825~~, wherein said sensory feedback element is a visual indicator.
24. (Cancelled)
25. (New) A device according to claim 5, wherein the suture is associated with a bone anchor.
26. (New) A device according to claim 25, wherein the bone anchor includes a screw or staple.
27. (New) A device according to claim 25, wherein the motive suture delivery mechanism is configured to deliver the bone anchor to a posterior portion of a patient's pubic bone.

28. (New) A device according to claim 25, wherein the body is sized and shaped to deliver the suture and associated bone anchor to a posterior portion of a patient's pubic bone through vaginal incision.
29. (New) A device according to claim 12, wherein the suture is associated with a bone anchor.
30. (New) A device according to claim 12, wherein the motive suture delivery mechanism is configured to deliver the bone anchor and associated suture to a posterior portion of a patient's pubic bone.
30. (New) A device according to claim 29, wherein the body is sized and shaped to deliver the bone anchor and associated suture to a posterior portion of the patient's pubic bone through a vaginal incision and wherein the motive suture delivery mechanism includes a sensory feedback element indicative of delivery of the bone anchor and associated suture to the suture attachment site, the sensory feedback element being a visual indicator.
31. (New) A device according to claim 30, wherein the visual indicator includes a cessation of twisting of said suture.
